

MINERALIZED SEAWEED

earthalive™

NATURE'S MIRACLE PLANT FOOD!

Mineralized Seaweed is a unique blend of high quality liquid seaweed extract, and nutrient dense low-sodium ionic sea mineral solution. Seaweed has evolved to thrive in extreme ocean environments, and when applied to your crops will aid in building plant health and tolerance to a wider range of growing conditions. The vitamins, natural chelating agents and amino acids from seaweed are combined with over 90 minerals and trace elements from ocean water collected from remote areas, far from urban and industrial pollution.

This biologically active mixture of compounds and elements improves seed **germination**, **promotes root development** and **increases bloom set and size** of flowers and fruits.

A GIFT FROM THE SEA

- Contains the highest quality seaweed, *Ascophyllum nodosum*, from the Atlantic Ocean and processed quickly at cool temperatures to preserve all of the benefits
- One teaspoon (5 ml) of Mineralized Seaweed will deliver an amazing 750 mg of sea minerals with only about 45 mg of sodium
- Improves seed germination
- Promotes root development
- Increases bloom set and size of flowers and fruits
- Relieves plant stress (cold, drought, etc.)
- Prolongs fruit conservation in storage

REAP THE REWARDS

- Increased tomato size (Colorado)
- Increased grain protein and yield (Montana)
- Increased rice yield (Thailand)
- Increased nutrient density in grapes (Ontario)
