

FARM GATE REPORT

EARTH ALIVE SOIL ACTIVATOR™

TRIAL DETAILS

PASSION FRUIT

Country: Peru
Region: Cascajal
Soil type: Loam
Variety: Brazileña

Application rate: 10kg /ha
Application method: Drench, at planting
Application date: 2016-12-01
Irrigation method: Gravity

RESULTS

Soil Activator™ was applied to a new planting of passion fruit and performance during the first harvest was measured. By the end of the first harvest season, these treated plants had yielded 86 tonnes per hectare; in the region, new plantings of passion fruit yield 50 tonnes per hectare on average.

This additional yield generated US\$3064 per hectare in extra income.
