

# FARM GATE REPORT

## EARTH ALIVE SOIL ACTIVATOR™

### TRIAL DETAILS

### SQUASH

<i>Country:</i>	Peru	<i>Application rate:</i>	4kg/ha
<i>Region:</i>	Trujillo	<i>Application method:</i>	Drench
<i>Soil type:</i>	Clay Loam	<i>Irrigation method:</i>	Gravity
<i>Variety:</i>	Zapallo Macre		

### RESULTS

Visual observations indicated that crop development was already improved 7 days after treatment.

The farmer harvested the squash plants a total of 5 times. In the area treated with Soil Activator™, he yielded a total of 80 tonnes per hectare, while the squash without Soil Activator™ yielded 50 tonnes per hectare (Figure 1).

The plants treated with Soil Activator™ also produced one of the largest pumpkins the farmer has ever grown, at 76 kg.
