

# FARM GATE REPORT

## EARTH ALIVE SOIL ACTIVATOR™

### TRIAL DETAILS

### WATERMELON

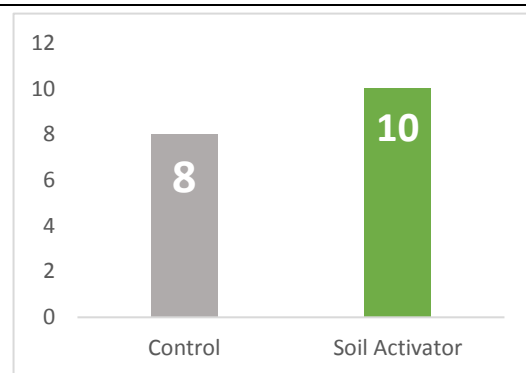

<b>Country:</b>	Peru	<b>Application rate:</b>	4 kg/ha
<b>Region:</b>	Trujillo	<b>Application method:</b>	Soil drench at base
<b>Soil type:</b>	Loam	<b>Application date:</b>	February 9, 2016
<b>Variety:</b>	Santa Amelia & Catira	<b>Planting date:</b>	January 25, 2016
<b>Irrigation method:</b>	Gravity		

### RESULTS

**VINE GROWTH:** Vegetative growth was increased by Soil Activator™. Treated watermelon plants produced longer vines with more foliage (Figure 2), and increased buds, flowers, and fruit.

**HARVEST AND PRODUCTION:** Based on early growth performance, this producer applied Soil Activator™ to the entire field.

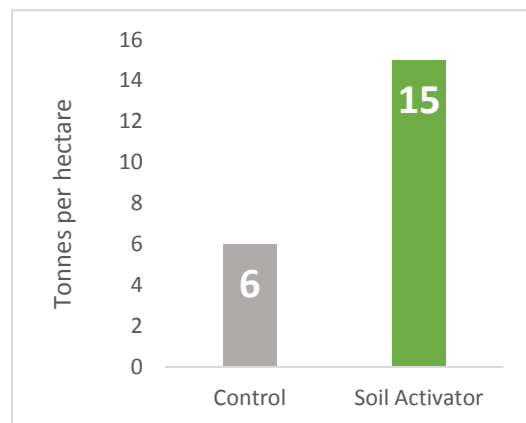

The number of harvests in the treated field were higher than typical (Figure 1) and led to larger than average overall yield (Figure 3)

**Figure 1:** Number of harvests

**Figure 2:** Left Untreated plants, Right Treated with Soil Activator™  
Watermelon plants first month after transplanting
